SUMMARY

As a passionate and aspiring software developer, I am a fresher in the world of coding, eager to embark on an exciting journey of innovation and technology. I am deeply enthusiastic about programming and driven by a relentless desire to develop innovative solutions. With a firm commitment to honing my skills and expanding my knowledge, I aspire to evolve into a proficient software developer in the near future.

EXPERIENCE

MOBILE APP PROJECT: PILL PAL

Jan 2023 - Jun 2023

- Designed and developed various React Native components, including Login, Manage Medications, My Data
- Created a dynamic main menu for seamless navigation to different app features.
- Implemented a "Take Pill" feature with time tracking, warnings, and undo functionality.
- Built a "My Data" component for highlighting important medications and preventing errors.

WEB APP PROJECT: PETIT

Sep 2022 - Dec 2022

- Developed a web application using React, enabling salon business owners and clients to manage appointments efficiently. Designed and implemented modular UI components for enhanced scalability.
- Utilized Trello-Atlassian project boards to optimize project management and established a dedicated workspace for UX design. Created custom Date Picker and Toggle Switch components for intuitive scheduling of available times.
- Developed a customizable sign-up form, improving the registration process for both customers and salon owners. Enhanced the user experience by adding container classes to specific views to prevent styling conflicts and updated global styles to meet zone-specific requirements.

ATGWORK COMPANY
Front-end developer

May 2022 - Aug 2022

- Developed an engaging and responsive demo website for a consulting company, leveraging HTML5, CSS3, and JavaScript to craft a visually appealing user interface.
- Collaborated closely with the design team to ensure a seamless user experience.
- Utilized Command Line Interface (CLI) for efficient debugging, troubleshooting, and automation of repetitive tasks.
- Demonstrated proficiency in GitHub by implementing effective branching strategies for feature development and bug fixing.

ATGWORK COMPANY
Technical Recruiter

Apr 2021 - Aug 2022

- Managed a team of technical recruiters both in the US and overseas, ensuring alignment with company goals and recruitment strategies.
- Conducted training sessions for technical recruiters to enhance their sourcing, interviewing, and hiring skills.
- Sourced and identified software developers based on specific project requirements and customer needs..
- Worked closely with the development team, leveraging front-end development experience to support UI/UX design and interview tools.

AWARDS & CERTIFICATIONS

- President List
- Dean List
